

## INVESTOR PROFILE

The Horizon Income portfolio is for conservative to moderately conservative investors. This model is designed for investors seeking current income and capital appreciation in a lower volatility portfolio. Using the HCM BuyLine, the portfolio provides the opportunity for greater risk-adjusted returns than a traditional passively managed fixed income account.

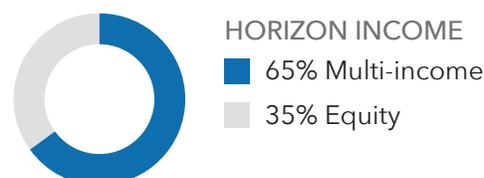

## METHODOLOGY

Horizon Income trades multi-asset income securities designed for conservative to moderate investors. The portfolio seeks to provide long-term growth of income along with moderate long-term capital appreciation. The goal of this portfolio is to outpace its respective benchmark through a full market cycle. This model typically contains holdings in one or multiple sectors of the multi-income market at any given time. These holdings are selected based on the signals generated by our quantitative model.

### HIGHLIGHTS OF INVESTING IN HORIZON INCOME

- Unconstrained in the multi-income market
- Typically contains holdings in one or two sectors of the multi-income market at any given time
- Can, or will, rotate sectors on a periodic basis
- Can get defensive during market downturns and allocate into defensive areas of the market, i.e., ultra short-term bonds, government securities, cash etc. The positioning of this portfolio is determined by the HCM-BuyLine®.

## HORIZON INCOME MODEL OVERVIEW DISCLOSURE

Horizon Income strategy typically seeks to participate in all markets and sectors by investing the portfolio in sectors which HCM's Proactive Section Rotation (PSR) methodology indicates have potential to meet performance objectives. PSR is a tactical asset allocation methodology, which attempts to identify the best performing sectors at a given point in time. The Horizon Income strategy utilizes the HCM-BuyLine® proprietary indicator to monitor market conditions and assist in determining whether or not assets should be invested in equity products or moved to cash, cash equivalents, or bond funds. Multiple indicators are monitored in an effort to identify such trends in the equity markets. The strategy is rebalanced periodically, and it is possible for the allocation to be adjusted, including when the HCM-BuyLine® indicates a strengthening or weakening of the equity markets. Because this Howard Capital Management, Inc. (HCM) strategy is actively managed, it may experience above-average turnover, which could have a negative impact on account performance. To discourage short-term investing and excessive trading, mutual funds, including those utilized in the Horizon Income strategy, may impose short-term redemption fees that range from 0.50% to 2.00%. HCM seeks to avoid these fees, but they may occasionally be incurred.

Comparative Benchmark: S&P 500 Monthly Reinvested Index (5%), HFRX Equity Hedge Index (30%), Barclays Capital US Aggregate Bond TR Index (65%). S&P 500 Reinvested is a gauge of the large cap U.S. equities market. The index includes 500 leading companies in leading industries of the U.S. economy, capturing 75% coverage of U.S. equities. S&P 500 Reinvested assumes dividends are reinvested.

Visit <http://www.standardandpoors.com/indices> for more information regarding Standard & Poor's indices. HFRX Equity Hedge Index is constructed using a UCITSIII compliant methodology, which is based on defined and predetermined rules and objective criteria to select and rebalance components to maximize representation of the Hedge Fund Universe. HFRX Indices utilize quantitative techniques and analysis, multi-level screening, cluster analysis, Monte-Carlo simulations and optimization techniques to ensure that each Index is a pure representation of its corresponding investment focus. Full strategy and regional descriptions (multi-language), as well as the full "HFRX Hedge Fund Indices Defined Formulaic Methodology" may be downloaded at [www.hfrx.com](http://www.hfrx.com). Barclays Capital US Aggregate Bond TR Index is a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS. The US Aggregate rolls up into other Barclays Capital flagship indices such as the multi-currency Global Aggregate Index and the US Universal Index, which includes high yield and emerging markets debt. The US Aggregate Index was created in 1986, with index history backfilled to January 1, 1976. Total Return (TR) assumes yield is reinvested. Visit <https://ecommerce.barcap.com/indices> for more information regarding Barclays Capital indices. Indices are unmanaged investment measures and are not available for investment purposes.
